IMPORTANT!!! URGENTLY!!! OFFICIAL STATEMENT FOUNDER AND CEO OF THE RECOIN GROUP MAX ZASLAVSKY

My fellow REcoin investors, real estate professionals and cryptocurrency enthusiasts!

For the last year, we've strived to tune the communications channels between the REcoin team and you, our investors and partners, in such a way that would create unbridled levels of openness in information exchanges to help you get genuinely excited about the REcoin project. I'm proud to say that it's worked out very well so far and I hope we'll manage to keep the atmosphere of trust that's been well established within our community clear of any conjectures.

On August 7, REcoin went live raising over \$1.5 million in direct REcoin token purchases during the first three days of the presale. The trust in our project became so vast that another \$2.3 million in expected earnings were generated as a result of the REcoin pre-sale success.

Unfortunately, at that point the US government did what it does best - interfered. In no uncertain terms, it let us know that we're not allowed to take steps to maintain the level of liquidity of our real estate holdings to keep your investments safe and secure, and our community truly decentralized and rid of any outside influence.

However, the good news, my fellow REcoin holders and investors, is that we're not going to let your tremendous faith in our collective project, its strategic goals, and tactical objectives go to waste. We all want to make the world a better, safer, freer place where we don't have to rely on the quirks of The Man to advance our ideas for the benefit of the entire planet.

With that in mind, I'm proud to announce the creation of the exclusive Diamond Reserve Club with tokenized membership for current REcoin owners. After all, the diamonds are forever, especially stored in secure locations in the United States and fully insured for their full value. This way they are truly not susceptible to any government manipulations.

Diamonds have high aesthetic value and are relatively easy to transport. Diamonds are actually the most concentrated way to store wealth. A high quality diamond with a mass of 2-3 grams can have the same value as 100 kilograms of gold.

Diamonds are quite scarce and natural colored diamonds are the scarcest among diamonds. Out of more than 120 million carats that are mined every year, only less than a quarter of them will be of gem quality. Out of gem quality diamonds, only one in a few hundreds of thousands possesses enough color to be classified as a natural fancy color diamond.

The Diamond Reserve Club members will be able to exchange their tokens for physical diamonds on the Club's platform in real time and hassle free.

The Club members remain entitled to all the opportunities and benefits they were promised at the time of joining the REcoin community. All the referral programs remain in place (and we've lifted the condition of having a real estate broker license to be able to take advantage of them), you're now going to be able to use smart contracts not only in real estate but in every facet of commerce, in which the Club is going to be engaged. All the bulletproof technological aspects of the token, the hedging, the mining, the sidechain policies, the partner programs and charitable activities - as the "Led Zeppelin" would put it, "The Song Remains The Same".

Naturally, everyone of our investors is entitled to a full refund, should they wish to claim it. Your funds are safe and secure, and are available for withdrawal at any moment, no questions asked. But we do encourage you to stay with the project and watch your tokens, so to speak, turn into diamonds.

All of your REcoin holdings will be seamlessly converted into Diamond Reserve Coin (DRC) at the rates favorable to you, my fellow REcoin investors! As our early supporters who gave the vote of confidence to a barely feathered startup, saw true value in REcoin and purchased first tokens as soon as the pre-sale started, at the time of conversion of your REcoin into DRC you get our undying gratitude along with 10% bonus in DRC. Just as is REcoin, DRC is powered by blockchain technology, offering a superior alternative to storing value in fiat currencies and we really wish to see you continue to take full advantage of this amazing technology.

As a REcoin holder, you are automatically entitled to the multi-level membership in the Diamond Reserve Club, meaning, the more tokens you own, the greater your access to the membership benefits is going to become.

For instance, a certain amount of tokens will make you eligible for the exclusive right of full access to the Club's most valuable partnering platform - the 101Lego creative communications holding with all of its know-how available to you on all of the holding's 18 (eighteen) platforms. You get to draw from the well of wisdom and experience of the 101Lego's stellar staff of professionals, its extensive client list is at your disposal, its affiliate partners are waiting for your call, and its database is ready for your business.

As you keep climbing the token ladder, you'll get full access to the rest of the DRC ecosystem, unlock all platforms and gain access to exclusive listings. You'll be able to take full advantage of such highly sought-after digital products as smart contracts and pay for them with your newly acquired autonomous digital financial instrument - the Diamond Reserve Coin.

Stated clearly, the goals of the Diamond Reserve Club are:

- to offer unique opportunities and benefits to former REcoin holders, current Diamond Reserve Club Members;
- to indefinitely prolong the lifespan and development of the Diamond Reserve Coin to increase its liquidity, visibility, enhance its credibility worldwide;
- to propagate the DRC as a new blockchain based proprietary instrument for a variety of financial transactions, database, and listings creation;

The Diamond Reserve Club reserves the right to carry out all necessary actions with the aim of creating and developing the DRC image and supporting its reputation by carefully screening each DRC member. Such actions include:

1. Hedging DRC membership tokens by physical diamonds;
2. Creation and development the Diamond Reserve Club's infrastructure;
3. Organizing of private and club events, conferences, talks, seminars, gatherings for the DRC members;
4. Search for partners and expansion of service packages and offers to the DRC members;
5. Consulting services to the DRC members;
6. Evaluation and admission of affiliate partnerships into the DRC ecosystem;
7. Prequalifying and auditing applications for the creation of DRC sidechains;
8. Development of technological solutions improving the DRC software as well as further enhancement of the blockchain;
9. Development of new templates for smart contracts, databases, listings, and the expansion of their use;

10. Involvement in all charitable, legal, social, and socio-economical aspects of the DRC community life;

11. Promotion and support of the Diamond Reserve Club and enforcing the compliance with Club bylaws, Membership Rules, and Regulations;

It is a glorious and exciting time, everybody! I hope we all enjoy it, seize the opportunity it brings us, and remain partners, colleagues and friends for many, many prosperous years to come!

Yours very truly,

Max Zaslavsky

I registered here to ask you what you think about it?

The idea of REcoin - REAL ESTATE - inspired me so much, and what we have now?

I think that the founders hat to think about modernizing, but not about cancellation and revolution. Who thinks the same?

I liked the idea of real estate and it was really good. I believe that the creators did not go away from this so easily and find a way out. It is not right. Now you will try with diamonds and if something goes wrong again change direction again? I don't like it and what happened at all

I also like this project only because of its main idea (real estate) but they didn't have any choice. Activity within the law is more important than their idea

Initially I became interested in Recoin precisely because it was backed by real estate. For me this was the main argument to investing money. I think that it is not right to lose the original idea of the project. Was there no other way out?

Do you think that DRC doesn't have a future? Explain your point of view because it is a fairly tricky one.

Yes, real estate as a base is brilliant idea, but USA law is too strick.

why did they start to develop this idea of real estate?
they didn't know the law - you say?
no
they knew, but they didn't told us about possible results
they just need a modernization

I disagree. Diamonds are a good investment, any jewelry. they will always be in price and they will be bought, the price of them grows, as well as real estate, but does not depend on any factors that often occur with real estate.

Even though they will refund it, the project is not just the same, as real estate was a much better asset to invest in.

Stability of the diamonds price is advantage and disadvantage. Investing your money in diamonds, you are unlikely to lose them and are unlikely to suddenly become rich

*katepagava wrote:*For a few weeks I haven't read this page. Have I missed smthg? Where is those amazing idea with the real estate??

That wonderful idea did not correspond to American laws so the founder began to change Recoin for the better DRC.

*Scout Georgenson wrote:*Well met, how do you guys think, does the cycle of DRC begins?

Because of information about the creation of the exclusive Diamond Reserve Club with tokenized membership for current REcoin owners, I think this cycle will be 50/50 similar like REcoin-cycle or I'm not right, Scout?

I disagree. Diamonds are a good investment, any jewelry, they will always be in price and they will be bought, the price of them grows, as well as real estate, but does not depend on any factors that often occur with real estate.

I totally agree with you it's true. Diamond and jewelry are really good investment.

Stability of the diamonds price is advantage and disadvantage. Investing your money in diamonds, you are unlikely to lose them and are unlikely to suddenly become rich

that what we can say about all type of investing

Bitcoin does the fact that the cybercurrency is primarily used for criminal purposes but that can be fixed soon by any law or something,

but i think it is really easy to use for online transactions 😊 and i am not some kind of criminal or something....
Peace %%%%

about bitcoin.com

Bitcoin.com is just one domain name used to promote Bitcoin. Bitcoin.com is not an official website. Just like nobody owns the email technology, nobody owns the Bitcoin network.

As such, nobody can speak with authority in the name of Bitcoin.
